

My Test LaTeX Document

A. User

November 17, 2025

1 Introduction

This is a test document to verify that $\text{\LaTeX}$ is compiling correctly. It includes a few standard elements like lists, equations, and tables. The document font should be Noto Sans.

Here is a simple list of items:

- First item
- Second item
- Third item

2 Testing Math and Tables

Here is a test of the `amsmath` package for a simple aligned equation. This demonstrates that math environments are working as expected.

$$E = mc^2$$
$$f(x) = x^2 + 2x + 1$$

And here is a test of the `booktabs` package for a simple table:

Item		Price
Category	Product	Amount
Fruit	Apple	\$0.50
Fruit	Orange	\$0.60
Dairy	Milk	\$3.00

Table 1: A simple test table for costs.

3 Conclusion

If you can see the title, sections, list, equation, and table, the compilation was successful. You can also test the link below.
